UV DTF STICKERS- ADD 1.00 EA.

UV DTF sticker Transfers are made for hard surfaces like glass, wood, metal or plastic.
 UV DTF sticker transfers are printed use UV inks that feel and look like painted enamel.
 They come with a high gloss varnish that gives the print a 3d feel since the ink is raised above the surface.

UV transfers are applied without heat or the use of special machinery. They are perfect for laptops, phone cases, windows, sunglasses. Applications of UV DTF Printing
 UV DTF printing is mainly used on hard substrates such as metal, leather, wood, paper, plastic, ceramics, glass, etc. It can be used in a wide range of applications.

It has a wide range of application scenarios- Personalized customization services: cups, keychains, desktop ornaments, badges, gifts, and other product pattern customization
 - Limited edition product production: weddings, conferences, exhibitions, competitions and other activities around the product label customization

*WE PRODUCE 2 EXTRAS ON EVERY ORDER, SO IF YOU NEED TO ADD ON OR DO LATER, WE CAN DO IT FOR THE SAME PRICE. MORE THAN 2 WOULD BE NEW DTF PRICING.
